

**PROPERTY ACCESS AGREEMENT FORM
LEAD WATER SERVICE LINE REPLACEMENT IEPA FY26**

The Village of Phoenix Lead Water Service Replacement Project will require access to private property to install a new underground water service line. The Village and its Contractor (listed below) will require access to the yard; access to the inside of the building to connect the new water service line to the existing water meter location and access post installation to conduct periodic, mandated, water sampling for laboratory analysis to quantify abatement efforts.

The undersigned, _____ ("Customer") grants to The Village of Phoenix ("Village") and to its approved Contractor/Agents an agreement to enter upon the Customer's property at _____ (address) Phoenix, IL ("Property") for the purpose of connecting the Customers' residence to the Village water main, at no cost to the Customer. The term of the agreement shall be 12 months following the date set forth below or final Village acceptance of the construction project.

For full-service replacement, the Village and its approved Contractor will use trenchless methods to install a water service pipe from the water main to a new Village curb stop or meter pit valve installation, then from the curb stop or meter pit valve installation to the water meter or premise plumbing located inside the Customer's Property. The Contractor and Customer will determine the location of the installation. The pipe and valves on the street side of the curb stop or water meter pit will be owned and maintained by the Village. The pipe and valves on the property side of the curb stop or water meter pit will be owned and maintained by the Customer.

The methods utilized for customer water service line installation replacement will leave the majority of the property undisturbed. The Village will provide a warranty of the material and workmanship of the Customer water service line for 12 months following completion of the construction project.

Upon completion of the work necessary to establish the new connection, including disconnection from the old water main, installing the Village water service connection, the Village curb stop or meter pit installation, and the Customer water service line, the Village will restore the Customer's outdoor Property as nearly as practicable to its former condition. The Contractor will minimize disturbance indoors at the Customer's Property. The Contractor will restore piping and concrete inside the building, but the Customer will be responsible for restoring any decorative indoor Property such as drywall, tile, wood paneling, or carpet.

I understand that this is a voluntary agreement. I may opt out of at any point **prior to the day of construction**, and that I am not responsible for any damages or injuries that are caused by the construction project. I also understand that the Village or Contractor listed below will be responsible for the work performed, but I will be responsible for final decorative restoration. I will prepare a proper working environment for the Contractor inside my building, clear of clutter and other impediments. The Village and the Contractor listed below are responsible for notifying me at **least 24 hours prior to accessing the property. Upon notice, the Village and approved contractor have access to the property between the hours of 7:00 am and 5:00 pm for one pre-inspection and one water service installation. Water service installation will require shutting off the water supply to your property for up to 4 hours.**

☐ I fully understand what is being offered by The Village of Phoenix as it pertains to the water service line replacement and hereby opt IN to participate.

☐ I fully understand what is being offered by The Village of Phoenix as it pertains to the water service line replacement and hereby opt out to NOT participate.
