Dear Water Customer,

As part of the Village of Dixmoor's Village-Wide Water Meter Replacement Program, representatives from Calumet City Plumbing will be replacing all existing water meters within the Village. This program is designed to modernize your water system and improve service reliability for residents and businesses.

Your water meter is located in an outdoor meter pit, so you do not need to schedule an appointment. Our installers will first inspect your meter pit and if conditions allow, may proceed with the immediate replacement of your water meter. They will knock on your door to notify you before starting the work. Please note that the cost of the new meter and its installation will be fully covered by the Village of Dixmoor. There will be no charge to customers for this service.

Important Information:

- Meter replacements will occur Monday through Friday, 8:00 a.m. - 4:00 p.m.
- Water service will be briefly interrupted during meter replacement.

All representatives from Calumet City Plumbing will carry official company identification. If you wish to confirm the identity of an installer, please contact the Village of Dixmoor at (708) 389-6121.

We appreciate your cooperation and assistance as we work to upgrade your community's water infrastructure.
